

ALUMINIUM PROCESSING FACT SHEET

BlueScope Sheet Metal Supplies offers a wide range of quality aluminium processing services, ranging from precision cutting to length, router cutting and laser cutting.

ROUTER CUTTING

Setting the benchmark for quality, our **Router Cutting** is fast becoming the processing type of choice for market segments such as marine, transport and automotive components. Fully integrated with our nesting based manufacturing software to eliminate waste and increase precision.

Our **Router Cutting** will give your aluminium product component requirements a clean, high definition edge. The most complex shapes can be cut with precision, ease and accuracy, meaning less post cut finishing, saving your business time and money.

ALUMINIUM ROUTER CUTTING CAPABILITY:

- Bed sizes: 2500mm x 12500mm
2500mm x 23000mm
- State of the art swarf extractor and automatic tool changing carousel
- Diamond head scribe for marking
- Process heights of 200mm and 350mm
- Compatible software with Autocad through DXF transfer.

ALUMINIUM PROCESSING

- Router cutting
- Laser cutting
